

The journey of the langoustine

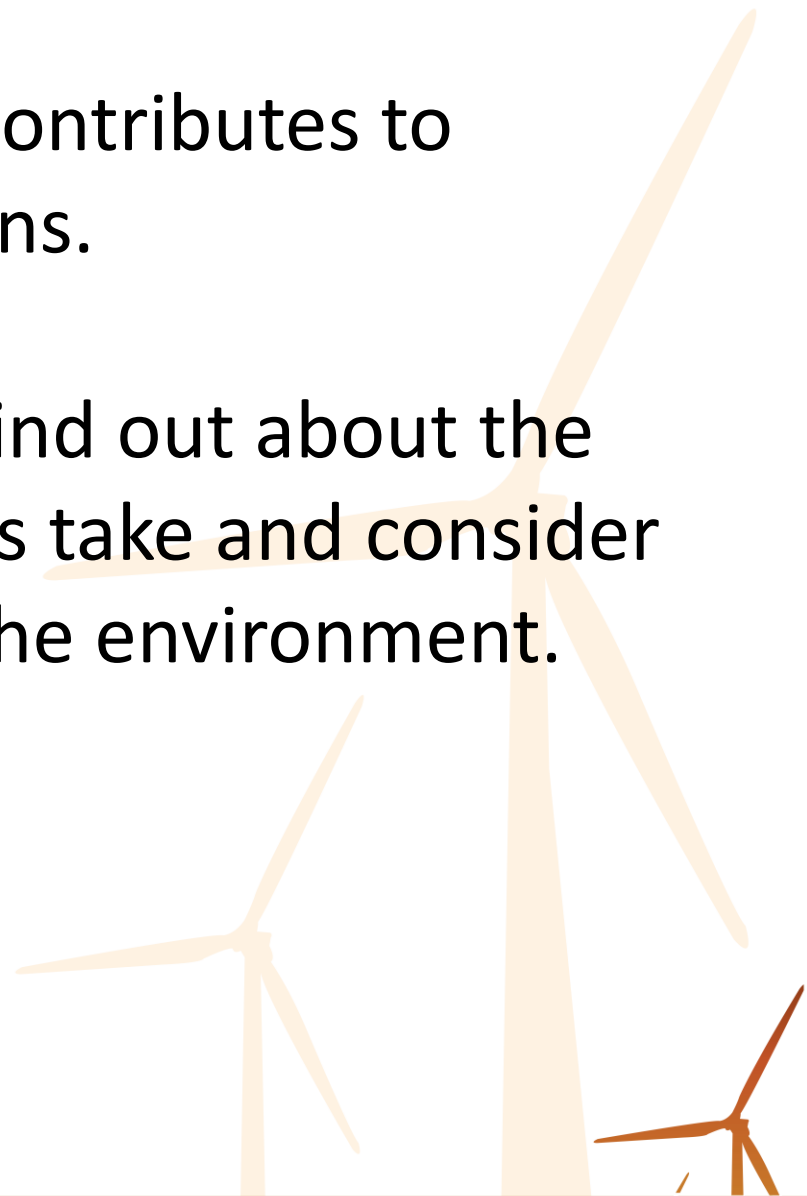

Do you ever wonder
where the food you eat comes from
or
the clothes you wear are made?

Look at a label on your clothes now

What we do every day contributes to greenhouse gas emissions.

In this session you will find out about the journey the langoustines take and consider the impact this has on the environment.

This session will take you on a journey from Scotland to Thailand and back again. You will visit the Suez Canal and the docks at Grimsby.

On the way you will:

- identify the importance of sustainable activities
 - explain the supply chain
- and
- calculate the carbon footprint for langoustines

Introductory Activity

- Dominoes

Activity 1

- Find out the supply chain for langoustine

Activity 2

- Research the length of the supply chain for the langoustine
- Calculate the carbon footprint

Activity 3

- Discuss findings and what changes you would make and why

Activity 4

- Guess the word/phrase
