

Does nuclear power produce carbon dioxide?

Natural resources which do not diminish over time  
Renewable energy comes from?

Hydropower is associated with harnessing energy from?

# Water

The main advantages of Renewable Energy are?

Capable of being maintained indefinitely  
Definition of 'Sustainable'

The main contributor to man made greenhouse effect?

# NO

What Building Regulation covers Energy Conservation?

What does 'SAP' stand for?

Standard Assessment Procedure

Which one of these fuels is renewable: Petrol, Diesel, Oil or Bio-Diesel

# 8 years

The forecasted number of years of landfill space left?

The energy source will not run out and has less environmental impact

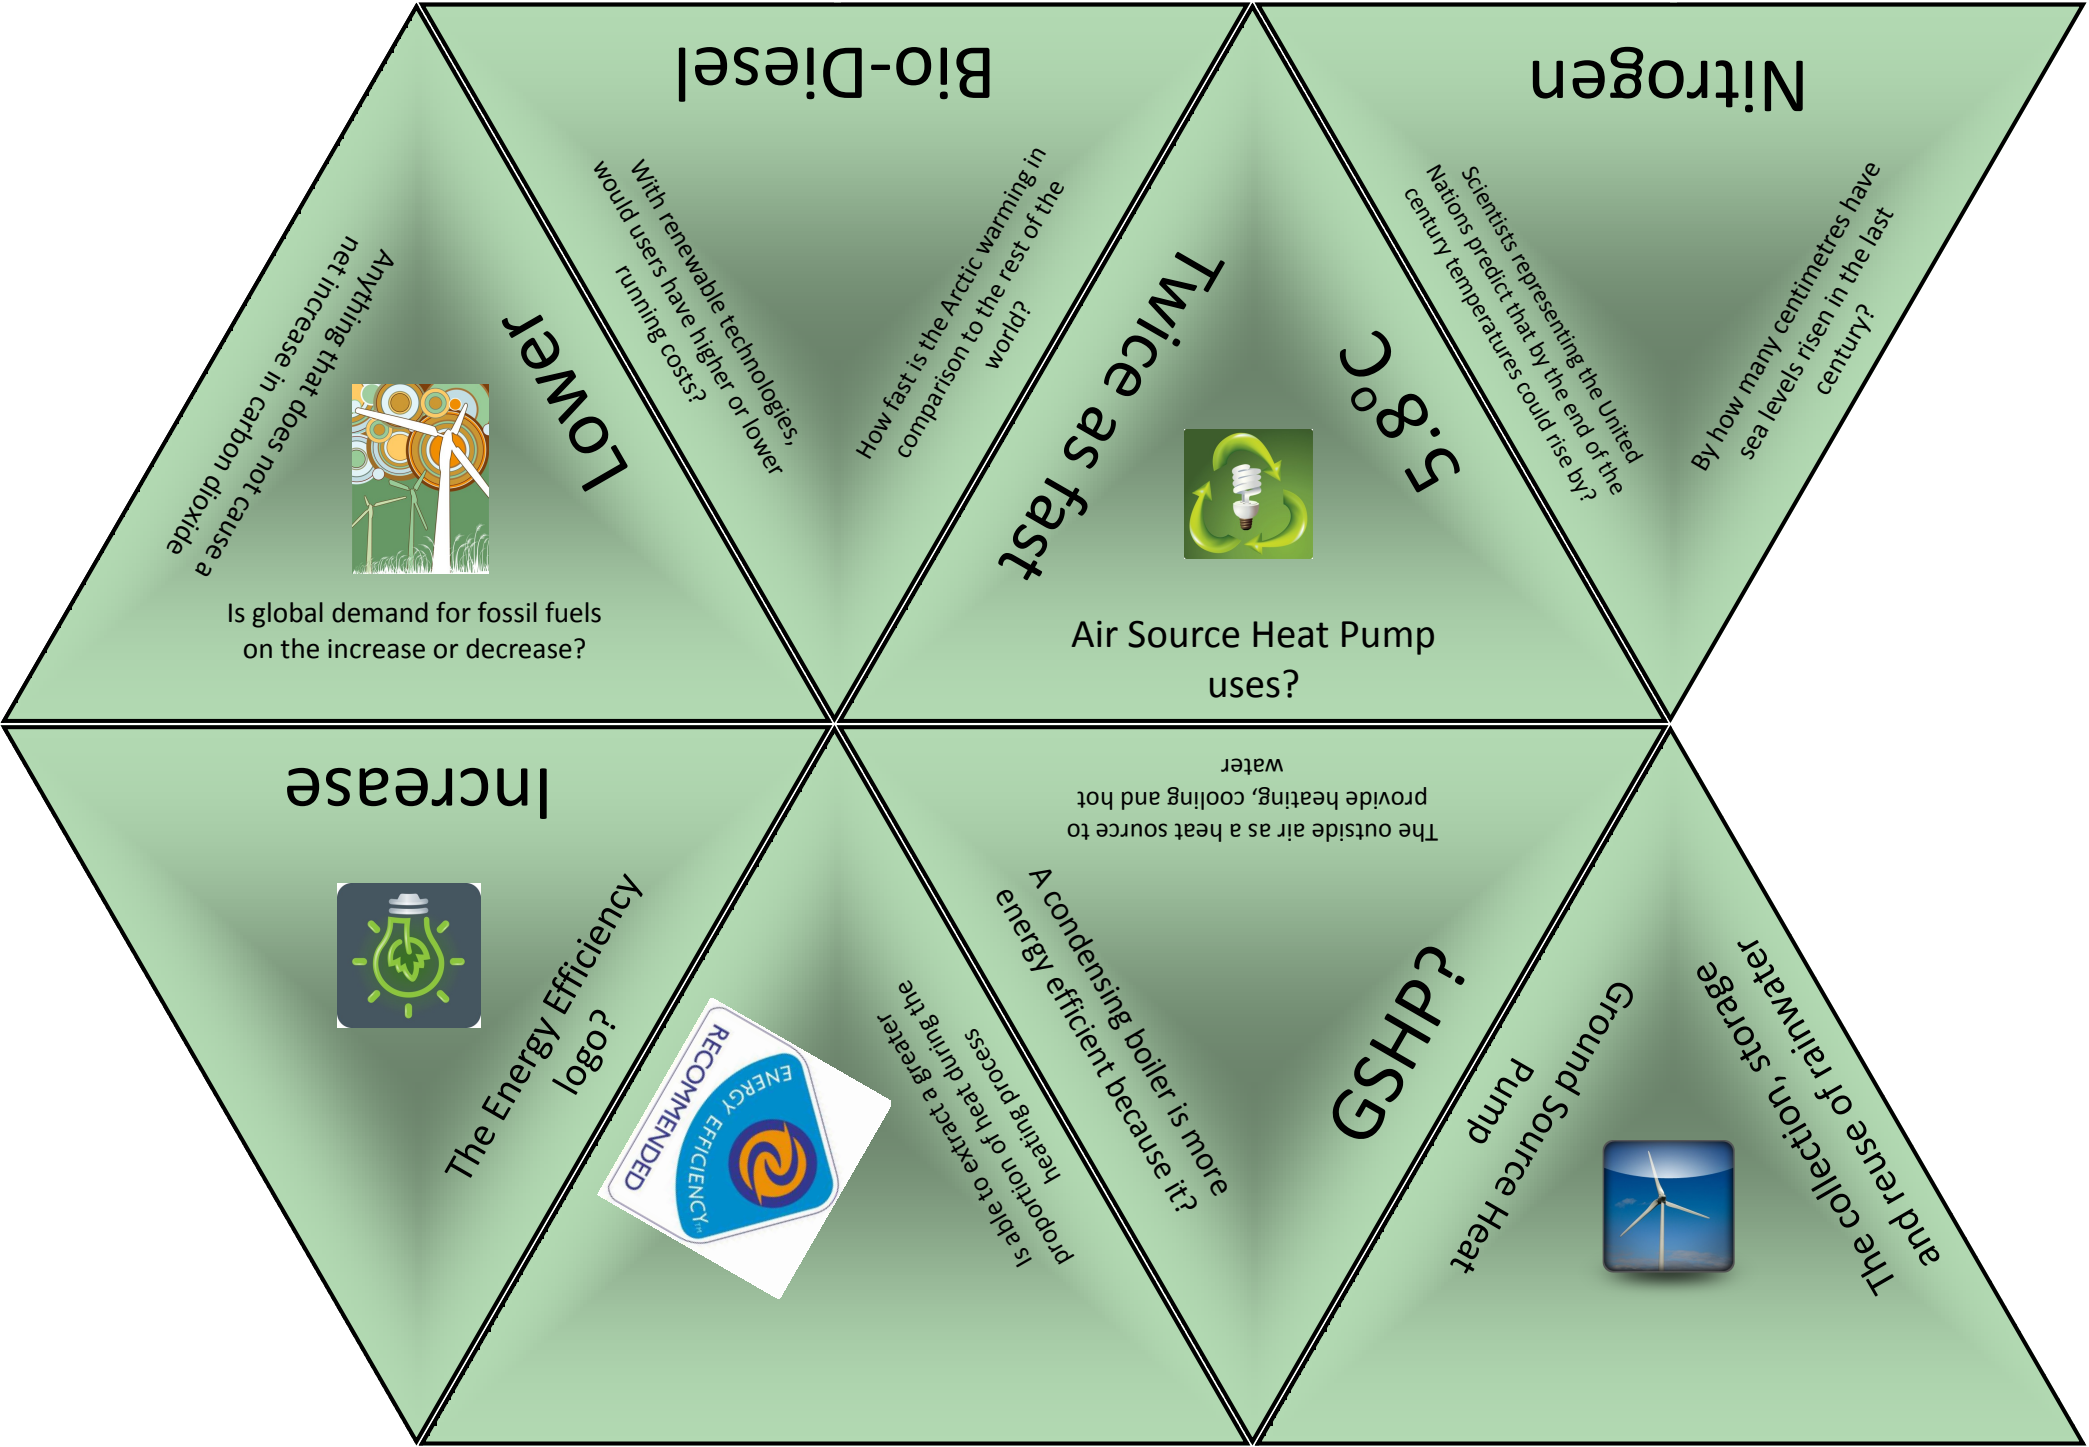

How long was the process of forming fossil?

# 10 million Years

A gas that is not considered to be a greenhouse gas?

# Solar Energy

# Nitrogen

Scientists representing the United Nations predict that by the end of the century temperatures could rise by?

By how many centimetres have sea levels risen in the last century?

5.8°C

# Twice as fast

Air Source Heat Pump uses?

# Bio-Diesel

With renewable technologies, would users have higher or lower running costs?

How fast is the Arctic warming in comparison to the rest of the world?

# Lower

Anything that does not cause a net increase in carbon dioxide

Is global demand for fossil fuels on the increase or decrease?

# Increase

The Energy Efficiency logo?

A condensing boiler is more energy efficient because it?   
 Is able to extract a greater proportion of heat during the heating process

The outside air as a heat source to provide heating, cooling and hot water

# GSHP?

Ground Source Heat Pump

The collection, storage and reuse of rainwater

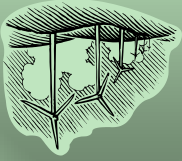

Fossil fuels are seen as a scarce form of energy because?

Approved Document L1

50-200 years

The energy we get from the sun is?

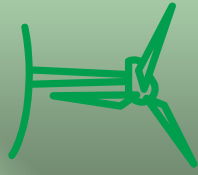

A Ground Source Heat Pump uses?

The earth's relatively constant temperature to provide heating, cooling and hot water.

What is the earth's average temperature?

Carbon Dioxide

Carbon Dioxide can stay in the atmosphere for?

They are not being made by nature as fast as we are using them

What does Carbon Neutral mean?

15-25cm

Disposal of which household appliance is controlled by legislation?

Natural Gas

Rainwater Harvesting is?

Refrigerators

A Non-Renewable fuel source?

15°C
