

Card E - Food Cost & Transportation

A local family is going to live off their garden instead of buying vegetables for a year.

They use 12 onions, 30 carrots and 25 potatoes a month.

A bag of 12 onions costs £2.98, a bag of 15 carrots costs £3.90 and a bag of 5 potatoes costs £2.10

The lorry that transports the vegetables to the local shop covers 250 miles. The lorry uses 1 gallon of diesel every 9 miles.
